

# Envision Ecommerce Announcing a New Extension for Magento 2! Add to Cart by SKU

We are in the last week of the year, so it is crucial for us, especially for online businesses to have a secure, fast website that can manage massive web traffic without going offline or slowing down the site's speed. So as an online retailer – you should take the advantage of these holidays by preparing your e-commerce website with ultimately new features, extensions, plugins, etc. that help you make 2016 your most fulfilling and prosperous year yet.

That is why, today we at **Envision Ecommerce** are extremely excited to announce our new extension named '**Add to Cart by SKU**' which allows Magento 2 merchants to easily showcase '**Quick Order**' block on any page of their e-commerce site such as CMS page, Product Category page, etc. Plus, also allow them to place or display 'Quick Order' form in any position/sidebar like Left Sidebar and Right Sidebar as well.

[Add to Cart by SKU extension](#) is mainly designed to beat Rush-Hour traffic and speed up the ordering process. With this extension, shoppers can quickly search and add products to their shopping cart by entering product SKU and a quantity in 'Quick Order' block. Despite that, there are many more useful features adhered with Add to Cart by SKU extension. So read on to learn;

**The main highlights of 'Add to Cart by SKU' Extension are;**

- Allows store owner to display or place 'Quick Order' block on any page of their e-commerce site (like CMS page, Product Category page, etc.) and in any position/sidebar (like Left

## Sidebar and Right Sidebar)

- Allows customer to quickly search and add products to their shopping cart via product SKU, without browsing each product category page.
- Displays search suggestions and auto-completes product SKU based on customers' typed text into 'Product SKU' field.
- In case customer enters a product SKU of a configurable product into 'Product SKU' field, it will display a message like "Please select options for this product".

These are the key features of our latest [Magento 2 extension](#). Now update your e-commerce store with Add to Cart by SKU to make the ordering process faster and accessible.

At [Envision Ecommerce](#), our entire team of [certified developers](#) continually focuses their efforts on introducing some useful extensions, plugins, etc. to make online buying and selling process easier and smoother for both seller and shopper. So always, stay tuned with us!
