

Envision Ecommerce's New Launch – Easy Customer & Order Import in WooCommerce

Today, we are proud to announce about our new WooCommerce plugin's launch, a powerful and user friendly WooCommerce plugin named as [Easy Customer & Order Import](#). We have just launched this plugin. As its name suggests, it allows a store admin to easily import customers, orders and also coupons from an eCommerce platform (other than WooCommerce) to WooCommerce via CSV. The plugin proves itself as a powerful importer in case of importing thousands of records. And this importing is possible within just a few clicks.

If your existing eCommerce store is suffering database failure, or you are migrating from your old eCommerce platform to WooCommerce, or you need to create backups for any future use, or you may just want to update your current WooCommerce store version, the Easy Customer & Order Import plugin is an ideal tool for you. It works best to import important data in all such situations without any loss. The store admin can use this plugin to maintain customer accounts as well as their order history. With its simple & forgiving importing format, it is now easy for you to migrate from one platform to WooCommerce.

With the Easy customers and order import WooCommerce plugin, a store admin can not only import bulk records with a minimum of hassle, but can also avoid any manual data entry of records. Overall, this WooCommerce plugin brings great value to every WooCommerce store and its owner, it touches.

If you are importing thousands of customers, orders & coupons, you can use this plugin at your WooCommerce store. Envision Ecommerce also supports customer and order exporting plugin

for those who want to export such records instead of importing. To know more about our plugin (or other WooCommerce plugins) and its features, connect with us and know how it goes.
