

How to Change URL of Magento 2 Admin, from Autogenerated URL Key to Your Own URL Key?

As [Envision Ecommerce](#) has promised to keep you updated with the latest information on Magento 2, today we would like to share with you our new research activity on how to change the URL of Magento 2 admin, from “Autogenerated URL key” to your own URL key.

There are 2-3 simple & easy steps involved in this:

Step 1: env.php

Go to env.php located at: magento2\app\etc

Step2: line #4, change autoseststring” to “myadmin”

In line #4, you need to replace “autoseststring” with “myadmin”.

For example:

```
In line #4, change 'frontName' => 'autoseststring' to  
'frontName' => 'myadmin'
```

So, now your new admin URL will be:
www.yoursite.com/index.php/myadmin

We hope that aforementioned steps work fine for you. We will keep posting & update you regarding any new experiments & advancements in [Magento 2](#). We welcome your feedbacks and also appreciate any other idea that suits best in this case.
