

# New Launch! Advanced Layered Navigation Extension for Magento 2

Continuing our momentum towards the effective releases of **Magento 2 extensions**, today we are announcing our next launch of **Advanced Layered Navigation Extension** for **Magento 2**. This extension helps your customers to easily navigate to their desired products available at your store.

Backed by multiple filters and some handy widgets, this **Magento 2** extension directs your customers to find the products they look for. Besides having flexible back end settings, it is also integrated with Ajax loading technology product filtering process of your online store. Not only it will positively affect your customers' shopping experience at your store, but it will also enhance your store's search engine ranking.

This expertly coded, easy-to-use and feature-rich extension is packed with a comprehensive list of features that will enhance your store's product search system. These features include:

- Optimized price sliders and widgets
- Custom filters like Stock filter, Rating filter and more
- Shop by brand option
- Highly configurable product tree
- A facility to create short custom URLs
- Flexible backend settings
- Mobile friendly interface and much more

To know more about our **Advanced Layered Navigation Extension for Magento 2**, visit our store here at **Envision Store**. If you have any query regarding this new launch or need any kind of assistance, our **Magento Certified Developers** are ready to lend a helping hand to you.

Stay tuned for the next big release of **Envision Ecommerce's** exclusive Magento 2 extension!
