

# New Magento 2 Extension Launch – Advance Integrated blog

Envision Ecommerce is already working hard to produce countless updates for Magento store, Magento 2 store, WooCommerce store and more. We today come up with another extension which is for Magento 2 store named **Advance Integrated blog**.

[Advance Integrated blog for Magento 2](#) is one of a kind extension in a market as it supports store owners to integrate blog section in their Magento 2 stores in mere minutes. This SEO friendly and fully compatible extension allows the store owner to manage everything related to the blog, including blog posts, categories, tags, blog widgets, permalinks, and much more on Magento 2 back-end with ease.

**The main highlights of our Advanced Integrated Blog extension for Magento 2 include:**

- Support Multiple Store & Languages
- Use SEO-friendly permalinks
- Allow to import data from WordPress and from aheadWorks blog extension for Magento 1.
- Integrated with Magento default XML Sitemap and RSS feed
- Fully compatible
- Allow customers to check the recent posts in the sidebar.

Further, the Advanced Integrated Blog Magento 2 extension does not only help store owners manage blog posts, but also helps them to increase the conversion rates of their e-commerce business. Isn't it something very exciting? If yes, then go and update your Magento 2 store with this extension for your online business enrichment. You can **buy Advance Integrated blog for Magento 2** at the pocket-friendly price at [Envision Ecommerce](#).
