

SKYROCKET YOUR PRODUCTS CREDIBILITY WITH OUR ADVANCE PRODUCT MAGNIFIER MAGENTO 2 EXTENSION!

With an aim to boost your products credibility, we at Envision Ecommerce are happy to announce the release of our new [Magento 2 extension](#) – “[Advance Product Magnifier Extension](#)”. The extension allows your visitors to magnify the product images by simply zooming into the images with just mouseover. Now, the customers can inspect your products more closely. Thus, it helps in increasing your products credibility among your store visitors and also supports visitors to make a quick decision about buying the product.

[Advance Product Magnifier Magento 2 Extension](#) is also best suited to provide an image slider functionality to display multiple images for the same product under the main product image box. Not only it is easy-to-customize but also very user-friendly & allows store admin to set up custom height & width of the zooming box.

Having installed this extension, a store owner can get more business out of their existing Magento store. To know more about the features of this Magento 2 extension (or other Magento extensions), you can connect with us & avail the information how it goes.
